

# Helicopter Attack 3D Documentation

## Overview

The **Helicopter Attack 3D** project is thoughtfully developed and user-friendly. Function names are clear, and scripts provide step-by-step guidance. This documentation explains the project folders functions. If you encounter any issues, please contact us at [blackrosedevelopers@gmail.com](mailto:blackrosedevelopers@gmail.com).

## Project Structure

### 1. Art

Art folder is subdivided into four folders.

#### A. Materials

Contains 11 various materials used in the game, which can be customized with different colours or sprites.

#### B. Models:

Contains 8 unique 3D models of objects in the game (FBX)

#### C. Textures:

Contains 10 textures of models that can be applied to materials (PNG)

#### D. Sprites:

Contains 3 sprites that can be used in menus (PNG)

### 2. Prefabs

The Prefabs folder includes five main categories:

- **Geometry**: 6 prefabs of different objects in gameplay for level design.
- **Particles**: 4 unique particle effects with different materials.
- **RoadObjectPacks**: 4 prefabs of obstacles
- **PlayerHeli**: a prefab of helicopter that must be used in the game
- **Targets**: 2 prefabs of different targets
- **UI**: 4 Prefabs of the game menus.
- **Gameplay**: 2 Prefabs of bullet and rocket.

### 3. Scenes

- **Scene\_MainMenu**: the main menu of the game and the starting one
- **Scene\_1**: the sample game scene where the battle takes place

### 4. Scriptable Object

- **MainDataStorage**: where the map number is saved and you can use it for different variables to be saved or load here.

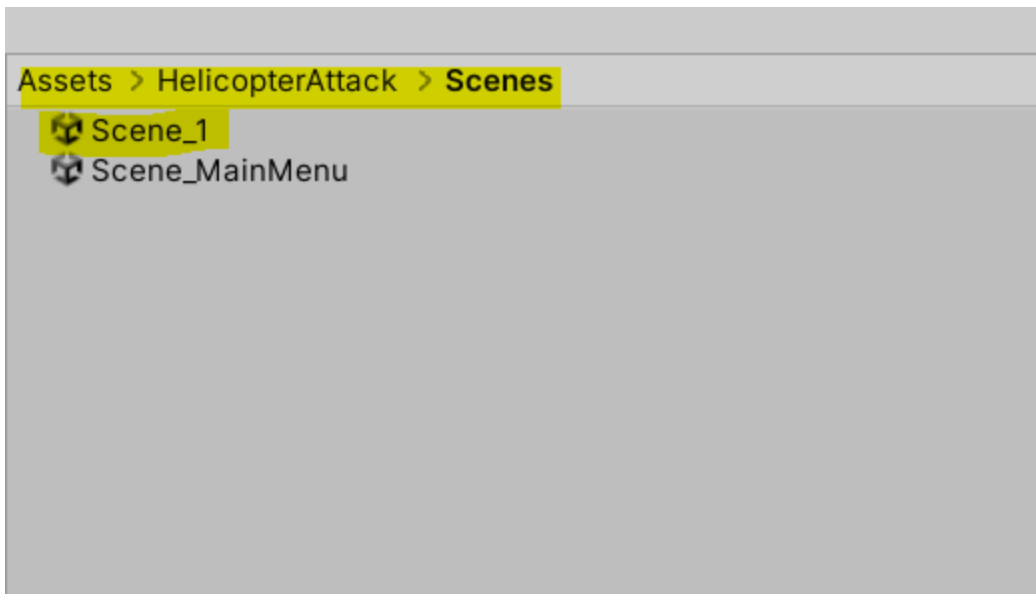

### 5. Scripts

17 Scripts are categorized into two folders, with clear names and functions to ensure easy understanding.

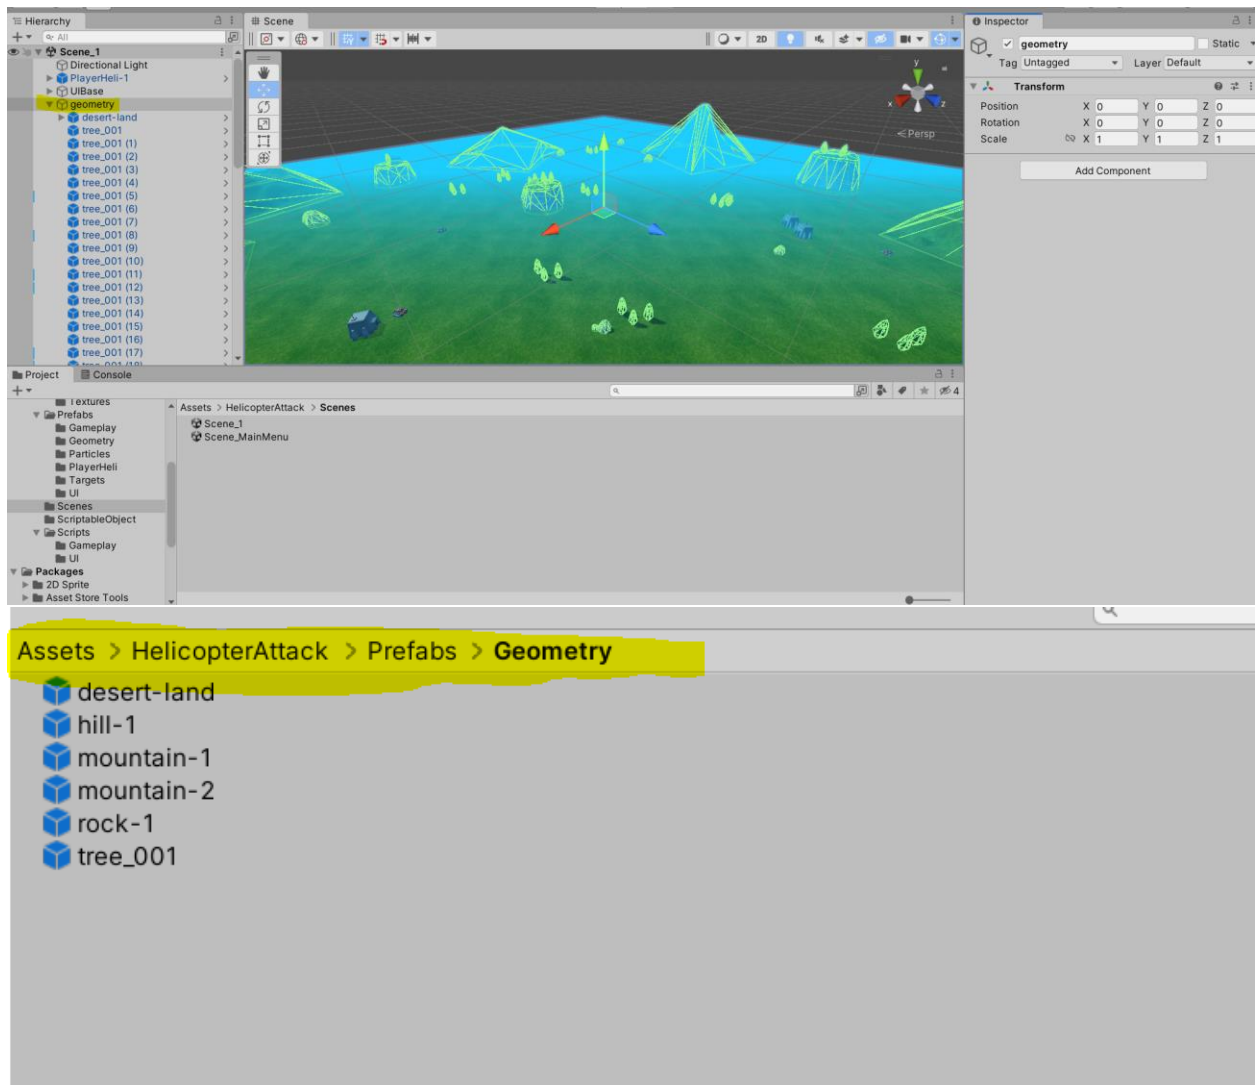

## How to set up scene:

Levels should be designed in 3D scenes

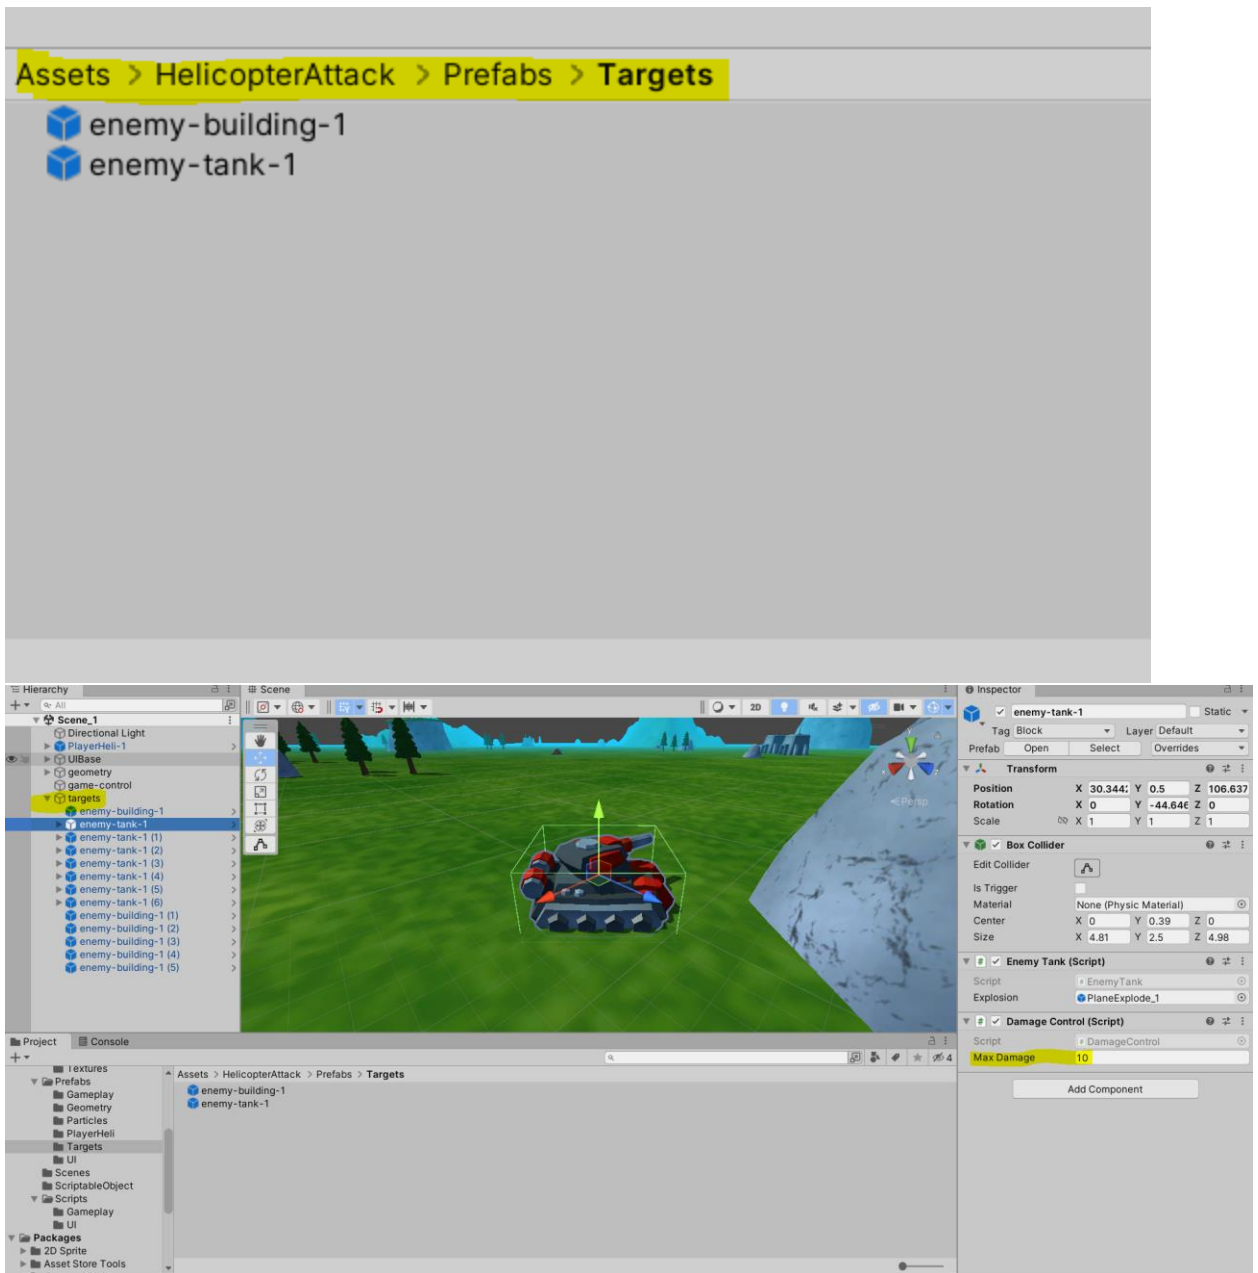

- 1- Navigate to Project – Scenes folder. Double click on Scene-1.

- 2- Find geometry object in the scene and you can put different prefabs in the scene and decorate it. you can find the prefabs of geometry in Prefabs – Geometry folder.

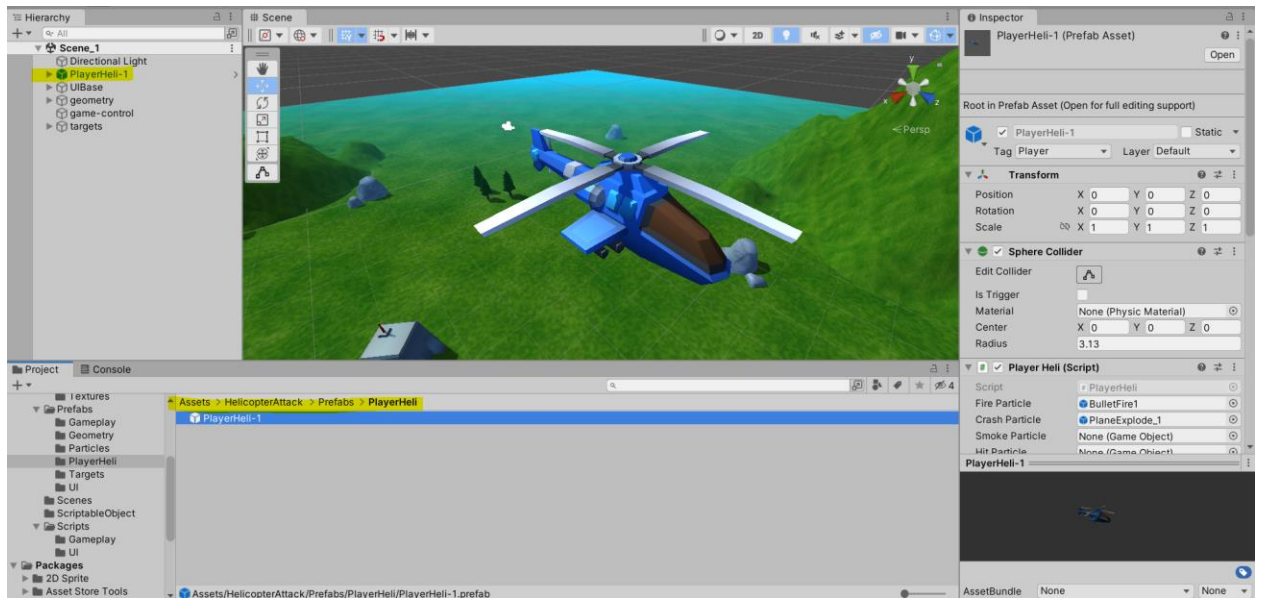

- 3- In the scene, you can put different obstacles and enemies around. All enemies are in Prefabs – Targets folder. Then for each enemy decide on how to explode with your assigned number of bullets.

- 4- Lastly if you intend to use different helicopters, navigate to prefabs
- playerHeli folder and create a new prefab the same as

## PlayerHeli.
